

Financial Benchmarking and Insights

Helping you understand how your child's school spends its money

This service shows how schools are spending their funding, and helps them find ways to use it more effectively. It replaces the *View my financial insights* tool and the *Schools financial benchmarking* service.

You can use it to compare schools, academies, or trusts across England.

Local authorities can also use the service to look at and plan support for children and young people with high needs.
